Personal Care Fragrances

www.dps-instruments.com

Eucalyptol, menthol, and camphor can be used in a surprising variety of ways. These aromatic and medicinal plants extracts enhance the flavor of many dishes, but their therapeutic virtues have been known for years. Among the best-known uses are rubbing these compounds on to soothe aching muscles, inhaling them to free up the sinuses, and also as an antiseptics. Consequently, they are found in a variety of creams, ointments, and other personal care products. The DPS Personal Care Fragrances GC Systems are designed to check the purity of the plant extract and verify the concentration of these compounds in the final product. The latest designed high resolution column and the sensitive FID detector does the hard work for you. The Series 600 GC is for analyses in the lab, or use the Portable Companion 1 GC Systems for analyses right where the samples are taken. The fast heating and rapid cooling column oven in every DPS GC vastly increases your sample throughput. The fully integrated Personal Care Fragrances GC Analyzer Systems are small and lightweight and all DPS systems are modular for expandability, upgrades, and easy service.
